Kristie and Eric. Based on all the conversation today here is a recap of what is going to happen. I sent an earlier email with this but it got lost in Amarillo texas somewhere. This is a less detailed version so let me know if anyone has any questions or if I missed anything.

1. Kristie will send the lab report with all Analytical results
2. Kristie and Mark will keep the SCRIBE project until all prelim data is loaded and validated
3. Data will be validated by latest Sunday
4. Once data is validated and published SCRIBE project will get released to Matt Hansen.
5. Report Summary tables sent today will only contain those analytes in the QASP.
6. Mark can you load the screening levels table into the scribe project and publish.

Eric. Are you going to want to see the final data come through the Flexviewer.

Melissa if Eric answers yes can you direct Kristie on what field to fill in so we only bring the 5 final results of the analytes in the QASP and not the full suite of analyses that are being loaded into SCRIBE.

Thanks Everyone.
